Material surcharge

Dear Sir or Madam,

for a long time now, enormous price increases and supply fluctuations have determined the Our daily activities on the raw materials side. The situation is made more difficult by the fact that it keeps every day new bottlenecks. There are new bottlenecks at our upstream suppliers, which present us with new challenges.

The raw material prices, especially in the area of resins, aluminum, wood, axles etc. are on a high level, plus additional costs in other areas, as well as logistics costs. The situation is still very tense and we are fighting every day to ensure security of supply to ensure.

We therefore have to add a material cost surcharge of 3% to the trailer base prices. The surcharge is, in a separate position, on our offers, order confirmations and invoices are shown. If you still have an offer without a surcharge, so this would, however, be due in the case of an order. We will always reassess the situation and inform you accordingly again. Should there be relief again on the market, the surcharge will of course be adjusted or dropped again.

We hope for your understanding and support in this special situation. You can be sure that we will do everything we can to continue to provide you with the quality you have come to expect and deliver on time.

Best regards
your Anschau-Team
